I ASK THE NEXT QUESTION TO THE DEVELOPMENT TEAM OF THE PROGRAMATION OF KDENLIVE FOR FUTURES VERSION OF THIS TOOL.

¿Is Possible extract and utilize some one modules SOURCES of controls of ohters programs to plug in in the KdenLive?? for EXAMPLE audio engines of SMPlayer TO The Equalization of sound engines?? in accordance to the Mono, Stereo, sorround 4.0 and 5.1 and ad some one general performance modules to major gain or ganance in the sound and an major systema of control volume of the sound in the KDEnLive?? This Idea is to give an major posibilities to appliance of the program Knde Live and obtain an major performance and purpose general of the KDEnLive. FOR ADD AN MODULE OF CONTROL OF general volume to sound of movies, and an add to the kndenlive an equalizator and channels control of sound similar to SMPLayer, and module of control the Fader inter clips or movies and an Tool To Video Jay Real Time processing?? For thsis objetives is desirable extract some ones modules of SMPlayer to conect some one plug in to major performance into the KDEnlive and some one module to add some one out jack t(on the rear panel HDMI or SuperVga or Audio and video plugs (RCAConections jacks o an conector to ausio and video externals to projectors of movies in SOME GIGANT projection on the wall??
