

## Kdenlive 0.8.2 information page

This page describes the version 0.8.2 of Kdenlive that was released on the 31st of October 2011.

Kdenlive 0.8.2 is mostly a bug fix release. An automatic backup feature was introduced, and the v4l / decklink capture was rewritten to use MLT instead of implementing our own capture routines, which should improve the webcam support. Apart from that, we did put lots of efforts into bug fixing and stability, the 0.8 release had many problems with corrupted project files that should now be solved. We also improved the handling of missing clips and proxy support which should now work correctly.

We encourage all users to upgrade to 0.8.2.

### Illustrated new features

#### Automatic Backup

Keep copies of older versions of your project file.

[1]

### Changelog

A (almost) complete changelog is available [here](#) [3].

### Bugs and features in the bug tracker

#### 6 features introduced in Kdenlive 0.8.2

- [issue #616](#) [4] **list of available fixed bitrates too coarse**
- [issue #306](#) [5] **Please add support for missing sox/ladspa effects**
- [issue #2231](#) [6] **white text on black background**
- [issue #2183](#) [7] **Generating Proxy clips provides no user feedback**
- [issue #2257](#) [8] **When multiple clips are selected, don't allow resizing**
- [issue #2274](#) [9] **Rendering 2-pass VOB reports crast at end of 2nd pass put, file appears okay**

## 158 bugs fixed in Kdenlive 0.8.2

- [issue #2251](#) [10] PID 20291 signal 8 floating point exception
- [issue #2395](#) [11] Speed = crop
- [issue #2397](#) [12] blue screen doesnt work
- [issue #2411](#) [13] Can't find buttons to select "Next frame" and "Previous frame"
- [issue #2394](#) [14] Rendering crashed
- [issue #2410](#) [15] Kdenlive 0.8.2 crashes as soon as I try to open the application.
- [issue #2412](#) [16] crash on open
- [issue #2364](#) [17] Crash whilst enlarging/reducing clip and project windows side by side whilst clip / timeline is playing
- [issue #2365](#) [18] Crash starting new project after previously starting a new project. :-)
- [issue #2008](#) [19] m4v freezes frame in the project monitor
- [issue #441](#) [20] unexpected behaviour when using 'I' and 'O' shortcuts in timeline
- [issue #1050](#) [21] crash when input a rotate (effect) value with keyboard
- [issue #1126](#) [22] crash on ubuntu 9.04
- [issue #1082](#) [23] crash while removing "pan and zoom" effect from a video
- [issue #1058](#) [24] In and out points incorrect on rendering
- [issue #1161](#) [25] problem re-open an closed issue
- [issue #1212](#) [26] 2 pass rendering H264 always failed
- [issue #1924](#) [27] kdenlive setup fails when trying to build atlas
- [issue #1239](#) [28] signal: Segmentation fault
- [issue #1813](#) [29] FLAC file remains silent
- [issue #1963](#) [30] Build fails from current svn
- [issue #1976](#) [31] L & R Audio tracks are displaced by one frame in the timeline
- [issue #1943](#) [32] Add Clip to Project Tree Ignores Photo EXIF Orientation Metadata
- [issue #2001](#) [33] Crash in BÃ©zier curves (frei0r) when processing frame
- [issue #2015](#) [34] Crop Effect - Cropping parameters don't seem to work correctly
- [issue #2030](#) [35] FLAC Audio refuses to play after it has been paused in clip monitor / project monitor / timeline but plays first time

- [issue #2040](#) [36] **Timeline: Markers slightly displaced**
- [issue #2061](#) [37] **Clip in not fixed on the timeline**
- [issue #2078](#) [38] **High memory leak**
- [issue #2053](#) [39] **No way to add a camera manufacturer to the "Supported Cameras" database on the forum**
- [issue #2080](#) [40] **clip missing or invalid remove from project**
- [issue #2094](#) [41] **Crash during the video editing when an MP4 track reach the end**
- [issue #2108](#) [42] **CFLAGS are ignored**
- [issue #2114](#) [43] **chromakey and other Transitions**
- [issue #2120](#) [44] **crashes opening .dv**
- [issue #2123](#) [45] **ladspa audio effects listed in the video category**
- [issue #2122](#) [46] **very slow startup if many ladspa plugins present**
- [issue #2121](#) [47] **Video crashes on pressing pause**
- [issue #2124](#) [48] **a bunch of sox audio effects listed in the video category**
- [issue #2137](#) [49] **crash on add clip**
- [issue #2142](#) [50] **I am completely unable to use kdenlive**
- [issue #2138](#) [51] **videos become twice as long as they should when rendered**
- [issue #2156](#) [52] **effect: fade to/from black is fade to/from red**
- [issue #2147](#) [53] **Kdenlive crash on load project**
- [issue #2152](#) [54] **Loading old project in current svn breaks transition**
- [issue #2150](#) [55] **"Open" dialog will not display \*.kdenlive files (current svn)**
- [issue #2159](#) [56] **kdenlive UI can't be resize under a screen of 1024x768**
- [issue #2168](#) [57] **Can't delete track in some projects**
- [issue #2157](#) [58] **Project file corruption: "Replaced wrong producer"**
- [issue #2205](#) [59] **Crash when loading projects**
- [issue #2204](#) [60] **video only works on first track in project with proxy enabled**
- [issue #2177](#) [61] **Crash when adding AVCHD clip to the porject**
- [issue #2174](#) [62] **Cannot save project with zoomed in timeline on frame level.**
- [issue #2208](#) [63] **Effect Timeline display shows only 2/3 of**

## **actual timeline**

- [issue #2206](#) [64] **Crash loading project**
- [issue #2210](#) [65] **Pan & Zoom loses all existing key-frames with settings if clip length is extended**
- [issue #2213](#) [66] **Pan & Zoom loses sync when panning with stacked clips**
- [issue #618](#) [67] **When rendering one clip does not become visible until 5 seconds after clip starts**
- [issue #785](#) [68] **guides not accessible from right click in time bar**
- [issue #620](#) [69] **DV capture should default to project folder**
- [issue #854](#) [70] **Jerky video when rendering to any format from Canon HV30 PAL m2t source**
- [issue #859](#) [71] **Cannot complete the DVD wizard with certain options.**
- [issue #933](#) [72] **Title Widget: Images can only be dragged on non-transparent pixels**
- [issue #955](#) [73] **removing a video from the time line does not remove attached effects**
- [issue #1039](#) [74] **Crashed when dragging ogg video clip to the timeline**
- [issue #1083](#) [75] **total crash fedora11 on trying to render .ogv file made by py-recordmydesktop**
- [issue #1133](#) [76] **check if xine-ui is installed**
- [issue #1367](#) [77] **several user interface elements or not drawn as expected**
- [issue #2196](#) [78] **Audio crackles on clip transition then affect following transitions, but not prior transitions, render + project**
- [issue #2195](#) [79] **random crash when quitting**
- [issue #1531](#) [80] **song and video problem**
- [issue #2189](#) [81] **Moving multiple clips/transitions goes wrong ("Error removing clip at ...")**
- [issue #2188](#) [82] **Incorrect profile in .kdenlive file**
- [issue #2187](#) [83] **When transitions are moved, they forget what track they are associated with**
- [issue #2199](#) [84] **kdenlive crash when deleting clip from project tree**
- [issue #2200](#) [85] **kdenlive crash when deleting clip from project tree**
- [issue #2201](#) [86] **Audio crackles + second keyframe ineffective within 'Volume (keyframeable)'**

- [issue #2254](#) [87] **Preview Volume sets Render Volume**
- [issue #2230](#) [88] **segfault starting kdenlive**
- [issue #2225](#) [89] **Selecting `Show Background' in Title Clip editing ignores Project properties**
- [issue #2224](#) [90] **wrong work of spacers in "Save profile" window**
- [issue #2217](#) [91] **Project corruption**
- [issue #2214](#) [92] **Corrupted project**
- [issue #1385](#) [93] **closing the main window leaves kdenlive in an unusable state (Mac OSX)**
- [issue #1452](#) [94] **Timeline cursor does not move synchronized with Composite transition cursor if transition not at beginning of timeline**
- [issue #1497](#) [95] **audio fade in/out do not observe "normalize" effect**
- [issue #2178](#) [96] **Proxying causes error: The project file contains clips with duration mismatch**
- [issue #1501](#) [97] **Transitions are reversed by default**
- [issue #1860](#) [98] **Does blue screen work**
- [issue #1839](#) [99] **error importing previously exported ogg files**
- [issue #1867](#) [100] **audio/video AVCHD synchronisation issue (Panasonic DMC-TZ7)**
- [issue #1868](#) [101] **Crash on start**
- [issue #1874](#) [102] **Is not working!**
- [issue #1886](#) [103] **Importing mpeg-2 clip crashing Kdenlive.**
- [issue #2119](#) [104] **Crash on loading .MTS file**
- [issue #1896](#) [105] **Force clip aspect ratio does not persist into project**
- [issue #1898](#) [106] **Build error [src/cmake\_bindir/CMakeFiles/kdenlive.dir/renderer.o] Error 1**
- [issue #1915](#) [107] **Unable to register on kdenlive forum !**
- [issue #1956](#) [108] **no se abre kdenlive**
- [issue #1831](#) [109] **speeding up video with the speed effect damages the picture quality**
- [issue #1821](#) [110] **RecordMyDesktop and Kdenlive OGV Problem**
- [issue #1692](#) [111] **Slideshow clips show strange transitions for images with different aspect ratio**
- [issue #2161](#) [112] **Title is not when an iso is created**
- [issue #1717](#) [113] **Crash if playing end of clip**

- [issue #1808](#) [114] Image related crash
- [issue #1720](#) [115] crash when adding lossless Matroska file to project
- [issue #1758](#) [116] crashes on moving split audio clip
- [issue #1790](#) [117] sound on MP4 file only plays through once
- [issue #2176](#) [118] Pan and zoom right diamond not always visible.
- [issue #1805](#) [119] Clip thumbnails are gray or not shown
- [issue #2303](#) [120] fails to build with Qt 4.5 (r5858)
- [issue #2318](#) [121] no audio on playback of rendering in some formats
- [issue #2312](#) [122] When exporting to flash, selecting more than one encoder thread renders no video to the .flv file.
- [issue #2311](#) [123] Compositing a clip with Speed effect make embedded .mov alpha channel going black
- [issue #2310](#) [124] MLT have some problems defining the current locale without the "swh-plugins" package installed.
- [issue #2308](#) [125] Loading project created with previous kdenlive version sets "Gain" audio effect to 0 after reloading kdenlive sometime
- [issue #2305](#) [126] Crash when loading project file
- [issue #2297](#) [127] When moving project folder, cannot abort copying cache files - Race between "Copying" and "File Already Exists"
- [issue #2304](#) [128] Disappearing tracks after rendering when using a title clip and some video effects combined
- [issue #2307](#) [129] Crash when using Gain effect on an entire track
- [issue #2321](#) [130] Rendering wrong bitrate in favorites.
- [issue #2353](#) [131] Crash on file load: Removed invalid transition
- [issue #2352](#) [132] Crash when loading project file
- [issue #2350](#) [133] keyframeable audio doesnt work
- [issue #2338](#) [134] Simultaneous 2-pass renders: log file clobbering
- [issue #2359](#) [135] Kdenlive crashes when i trying to separate sound and video
- [issue #2269](#) [136] Obscure effect stops working when keyframe is added
- [issue #2336](#) [137] move tool randomly does not move transitions and compositions or moves then to wrong

## places

- [issue #2335](#) [138] DVD Wizard doesn't show chapters when it is called by Render
- [issue #2332](#) [139] Latest SVN code does not render different bitrates.
- [issue #2331](#) [140] crashes on title generator font selection
- [issue #2296](#) [141] crash when adding clips
- [issue #2113](#) [142] crash when removing clip from project
- [issue #2219](#) [143] Tracks getting duplicated when moving them around
- [issue #1226](#) [144] Vignette doesn't work
- [issue #2194](#) [145] Crash when unchecking "proxy" on a clip
- [issue #2191](#) [146] Rendering does not work at all
- [issue #2166](#) [147] crash after adding Canon HG-20 1080i clip
- [issue #2165](#) [148] Proxy video still rendered event if Render using proxy clips is disabled
- [issue #2162](#) [149] Most Frei0r Plugins do not work correctly
- [issue #2134](#) [150] crash when switching projects
- [issue #2068](#) [151] effects are not adaptive to implementation version
- [issue #2117](#) [152] Using the speed effect crashes render
- [issue #2084](#) [153] Crashing when pressing "pause" on previewing
- [issue #2260](#) [154] Effects don't work properly after mlt upgrade.
- [issue #2261](#) [155] problem with volume (keyframable) sound
- [issue #2292](#) [156] Normalize effect parameters aren't taken in account
- [issue #2291](#) [157] melt rendering hangs
- [issue #2286](#) [158] crash when attempting to render 10 simultaneous tracks
- [issue #2284](#) [159] build-kdenlive.sh exits with error
- [issue #2279](#) [160] Compositing transition moves and scales bitmaps
- [issue #2278](#) [161] Playing Raw-DV in the Project Monitor lead to crash of Kdenlive
- [issue #2277](#) [162] Segfault when starting kdenlive
- [issue #2275](#) [163] Speed effect does not work over 999
- [issue #2270](#) [164] Loading project created with previous kdenlive version sets "Gain" audio effect to 0

- [issue #2265](#) [165] **No audio in Vorbis rendering (both OGV and WebM)**
- [issue #2264](#) [166] **Crash after deleting chapter in DVD wizard**
- [issue #2295](#) [167] **Kdenlive crashing when playing video**
