Howdy all,

I seem to have developed a problem with rendered audio sync / quality.

It developed after I installed the 11\_16 PPA Sunab Devel version.

Everything audio was working fine before. The problem still seems to exist with the current 11-22 Sunab PPA. Here are links to a couple of short files that show the problem.

[http://hawaiipoliticalreporter.org/video/11\\_24Test.mp4](http://hawaiipoliticalreporter.org/video/11_24Test.mp4) [2]

[http://hawaiipoliticalreporter.org/video/11\\_24Test.mpg](http://hawaiipoliticalreporter.org/video/11_24Test.mpg) [3]

I tested the players with other previously rendered files they play fine.

The video seems to render fine on any version previous to the 11\_16 release.

I tried it with a variety of materials and sources. The one above was originally from NTSC DV.

I wonder if this has something to do with Ubuntu switching to avconf and the difference in settings per

<http://forum.subsonic.org/forum/viewtopic.php?f=2&t=10655&p=48326&hilit=...> [4]

I have not tried fooling around with this yet, but I did check the MPEG 2 render settings in the current devel version vs the older working ones and they seem to be the same.

It is possible there is some conflict as I did all the Ubuntu upgrades also with it.

My upgrade history log is [hawaiipoliticalreporter.org/video/history.log](http://hawaiipoliticalreporter.org/video/history.log)

I am running Ubuntu 12.04 LTS with 320-33 generic I think 32 bit version.

Let me know any tests, steps, logs that will be helpful. I need to edit a show soon, so I might need to uninstall this and try a previous sunabl version. Any tips on how to get that version ?

He seems to list only the last two (which seem not to work on my machine).

Thanks for your help.

Ross
