Converter Ultimate, and buy One get one free (for Video Converter tools)!!!

Summary: This guide will show you the easiest way to [rip and convert Blu-ray/DVD to Galaxy Note 10.1](#) [3], Galaxy Tab, Galaxy Note 2, Galaxy S3 supported videos so that you can play your favourite Blu-ray/DVD movies on your Galaxy Tablets and smartphones.

[2]

Samsung's Galaxy gadgets like the Galaxy Note 10.1, Galaxy Tab, Galaxy Note 2, Galaxy S3 are great for watching movies. However, none of them have BD drive or DVD drive for playing Blu-ray/DVD movies. If your movie is still on a Blu-ray or DVD, you'll need to convert Blu-ray/DVD to Samsung Galaxy supported video formats first and then transfer the converted video files to your Galaxy Tablets and smartphones for playback.

To get the work done, a Blu-ray/DVD Ripping tool is needed. Here **Pavtube Blu-ray Ripper [4]** (Currently on sale - **30% OFF during Pavtube's Thanksgiving Specials [2]**) is highly recommended. It's an all-in-one and easy-to-use movie converter for Galaxy which can help you decrypt and compress Blu-ray to Galaxy Note 10.1, Galaxy Tab 2 10.1, rip DVD to Galaxy S3/Galaxy Note 2 optimized formats at ease. If you are a Mac user, you can use its equivalent Mac version - **Blu-ray Ripper Mac [5]** to finish your work on Mac (Mountain Lion included). Now just download the right version and follow the steps below to rip and copy your Blu-ray/DVD movies to your Samsung Galaxy phone and tablet.

[How to Convert Blu-ray/DVD to Samsung Galaxy compatible video formats \[3\]](#)

P.S. The quick tutorial uses BD Ripper for Windows Screenshots. The way encoding Blu-ray/DVD to your Samsung Android device on Mac is almost the same. NOTE a BD drive is needed for Blu-ray ripping.

Step 1: Launch the top [Blu-ray/DVD Ripper for Galaxy \[4\]](#), insert the Blu-ray or DVD disc to your BD drive or DVD drive, and then click the "Blu-ray disc" icon to navigate to the videos you want to convert. You can also add DVD disc, ISO file, IFO file or DVD folder.

Step 2: Select output format for your Samsung devices. There are optimized format for Samsung Galaxy Note 10.1, Galaxy Tab, Galaxy Note 2, Galaxy S3 under "**Format > Samsung**" category. Just choose the right preset for your Galaxy.

If you like, You can also click "Settings" to change the video encoder, frame rate, resolution, etc. Remember the file size and video quality is based more on bitrate than resolution which means itrates higher results in big file size, and lower visible quality loss.

Step 3: When everything is OK, just press the "Convert" button to start the conversion from Blu-ray/DVD to Samsung Galaxy Tablets MP4 videos. It will not take much time. Just wait for the conversion process to get done.

After the ripping, you can click "Open" to locate the converted MP4 video files and just transfer them to Samsung Galaxy Note 10.1, Galaxy Tab, Galaxy Note 2, Galaxy S3 for watching without limitations!

P.S. Samsung provides a guide to describe the existing data transfer methods that are already available to you. For more information, visit [how to Transfer Media to Your Android](#) [6]. What's more, if you have no idea about Galaxy Tab file transfer on Mac, you can follow [how to Sync with Mac using Kies](#) [7] to learn more.

You can also get the **20% Off discount All-in-one Blu-ray Video Converter Ultimate** [8] tool to encode Blu-ray/DVD and various formats of 1080p/720p HD videos to your Samsung Galaxy Tablet and smartphones for watching.
